

Verdad

Austin, Texas

CLIENT	Perry's Restaurants
ARCHITECT	Aria Group Architects
ROLE	Construction Manager

The newest concept from Perry's Restaurants, Verdad, opened in Austin, Texas in late 2023. The 10,000 square foot restaurant was built out on the ground level of The Grove mixed-use development in central Austin. The space contains an expansive open dining area, three private dining rooms and three patios providing guests with a sophisticated, elegant dining experience.

The restaurant's design mirrors the menu: vibrant and artisanal. Stunning terrazzo flooring with an intricate, organic pattern runs throughout the space and is carried up to the underside of the centrally-located focal point bar. Decorative masonry breeze block was procured from Australia and is used to separate bar dining from main dining. The restaurant's mechanical systems were installed in building shafts through two floors of occupied office space, requiring off-hours construction and intense coordination.

ICI's working relationship with Perry's began more than a decade ago. To date, ICI has completed a dozen projects for the restaurant group.
